THE RING

BRIEF: MASTERPLAN;
LOCATION: NOVOKURYANIVO, MOSCOW;
TEAM: U.SHUTKO, A.GORBULINA, M. MILAEVA; [+ 97 CO-AUTORS]
TIMEFRAME: SEP'24 - JUN'25.

In the south of Moscow, an existing railway ring encloses 314 hectares. Above the tracks rises an 18-metre-wide, 75-metre-high mixed-use wall that concentrates functions on the perimeter and leaves the inner landscape untouched

– a vertical masterplan. The project is shaped by walking: 3 horizontal avenues organise connections and functions. One hundred co-authors designed its fragments, later assembled into the ring and documented in The Ring Book.

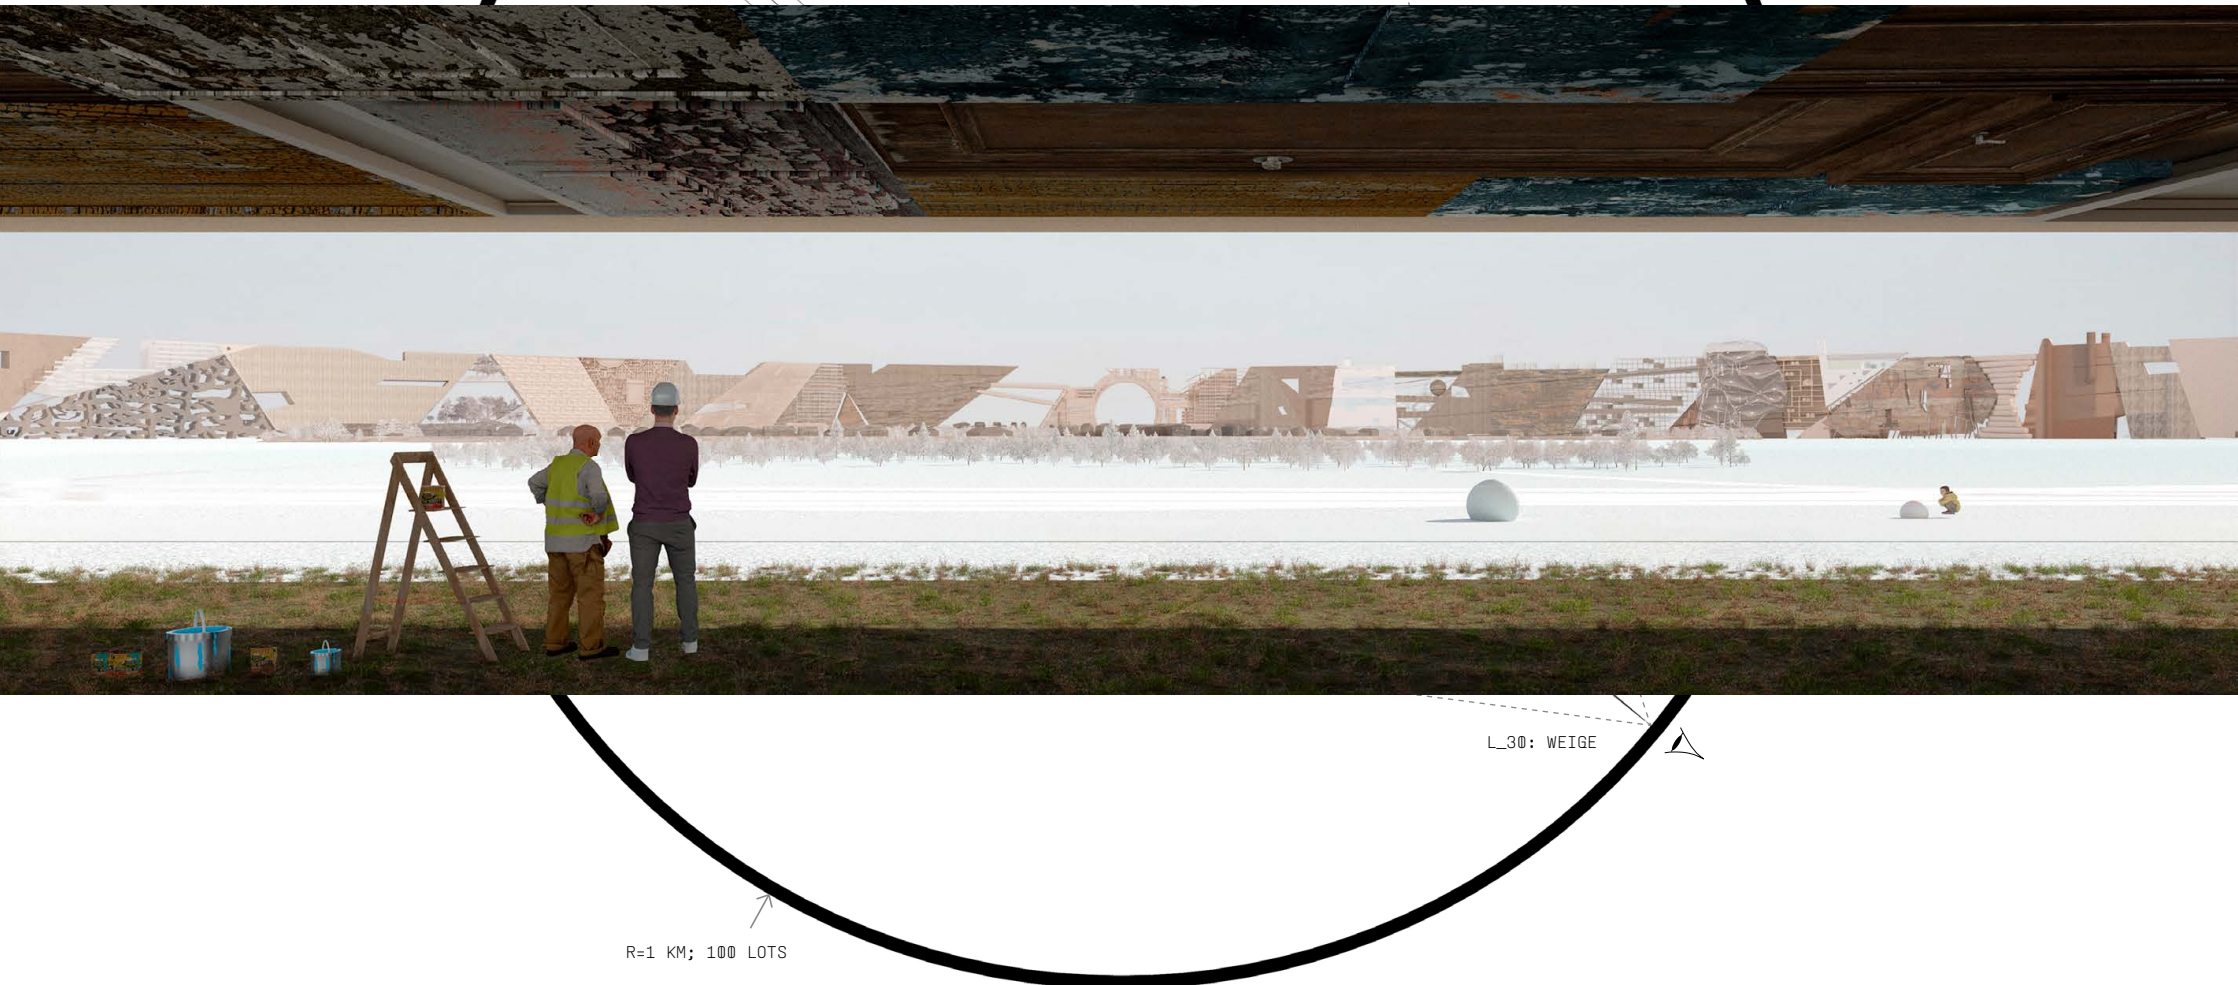

FOR THE PROJECT, A CUSTOM WEBSITE WAS DEVELOPED BY ME, REGULARLY UPDATED WITH THE RING DRAWING, CO-AUTHORS, AND THEIR WORKS.

THE RING: PEEPHOLE

BRIEF: THEATER;
LOCATION: NOVOKURYANIVO, MOSCOW;
INDIVIDUAL PROJECT;
TIMEFRAME: SEP'24 - DEC'24.

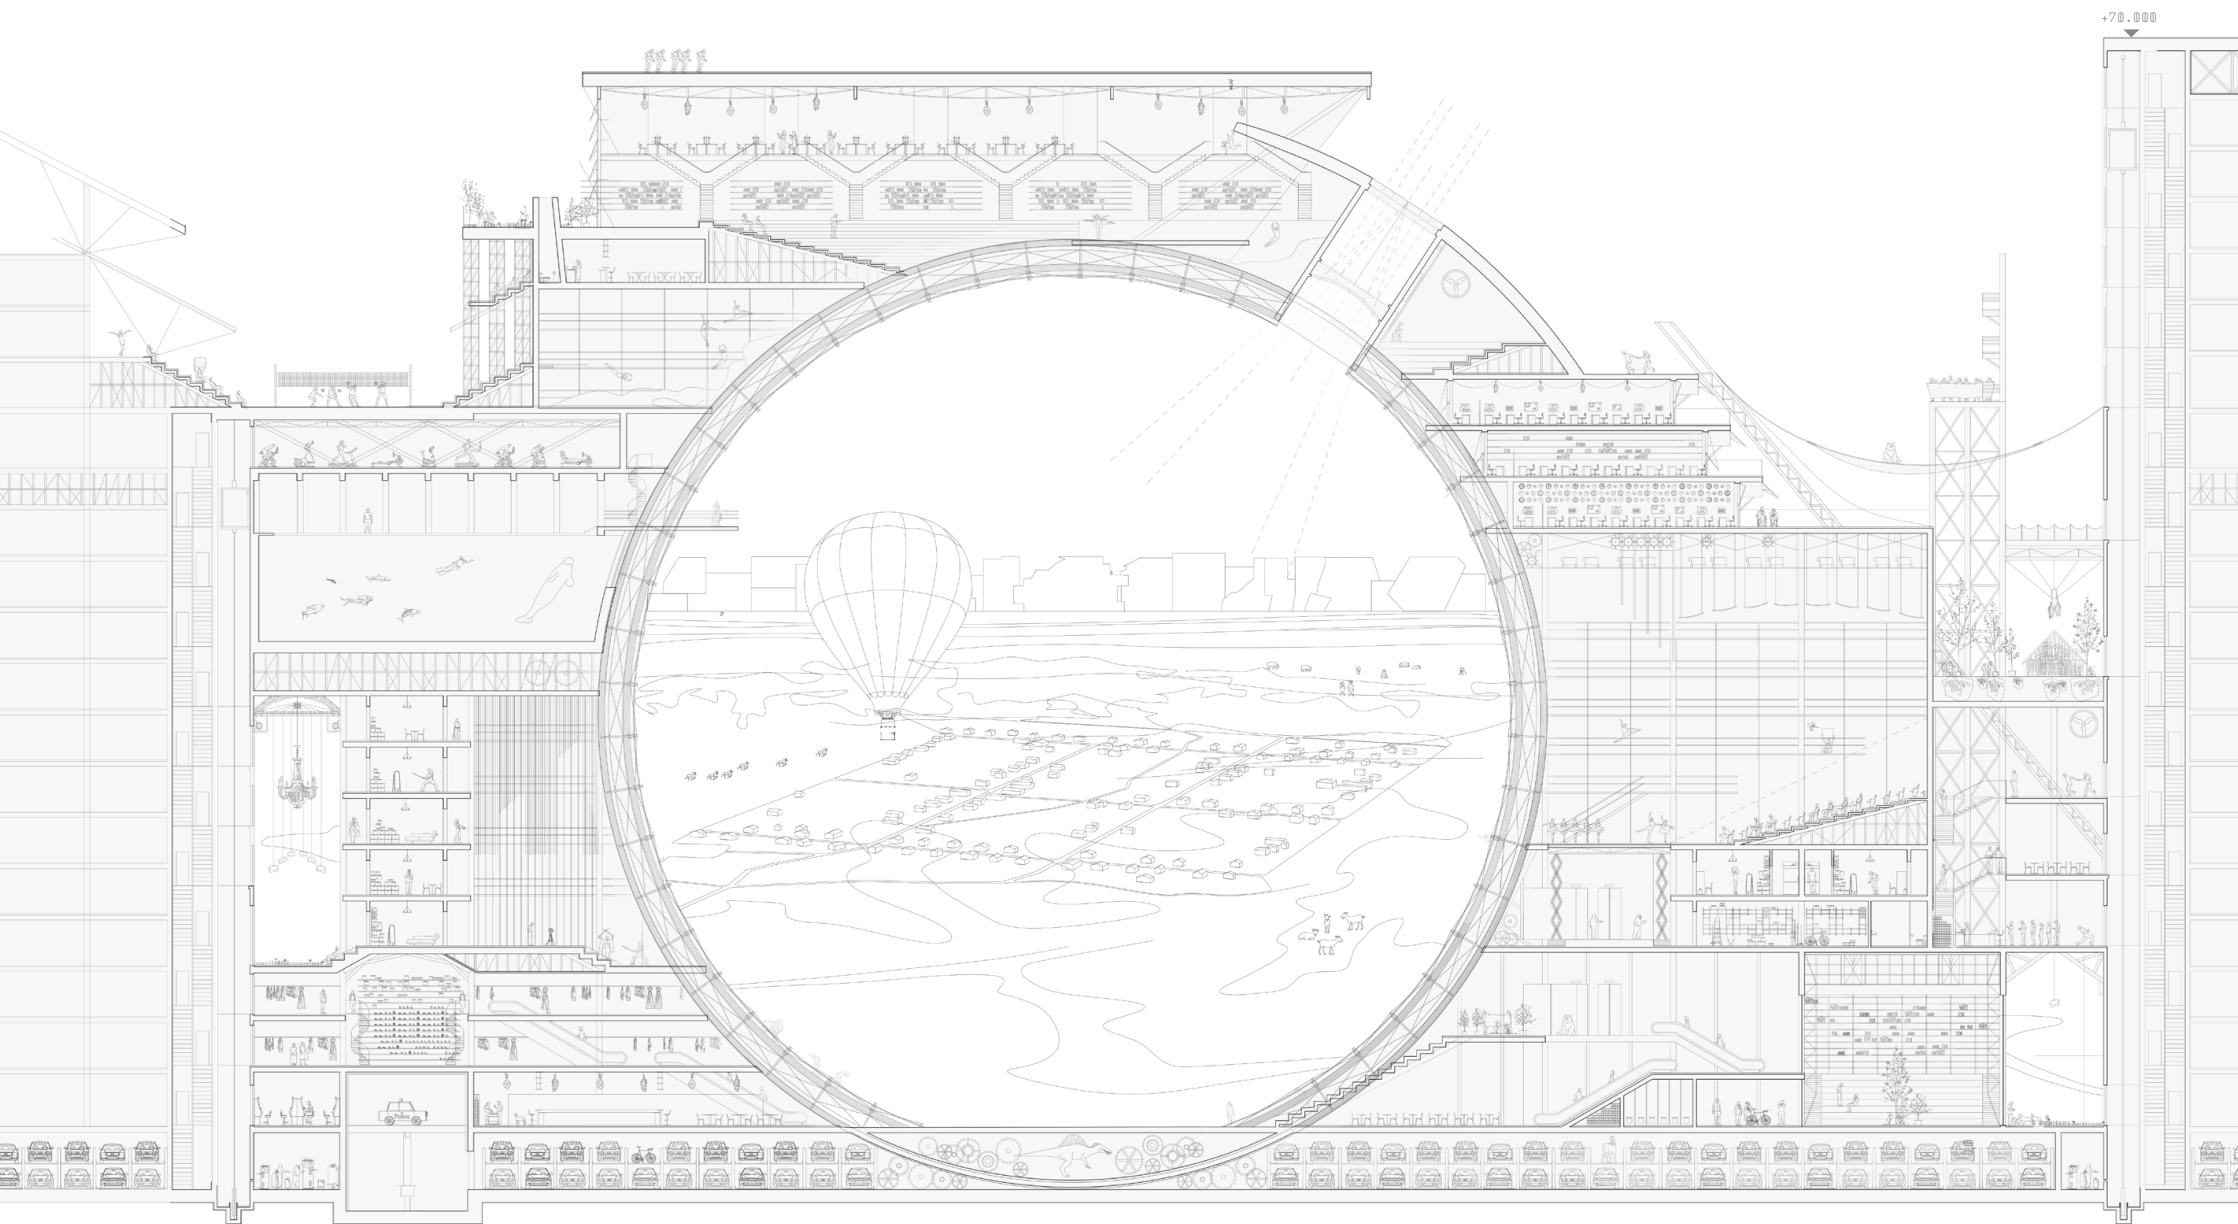

The Peephole is a void carved into a circular wall, forming a vertical urban square. The circle's outline is essential; the complex system around it intensifies the sense of the wall being "punctured," exposing the life inside.

The theatre includes an enclosed hall with backstage, an open stage, and surrounding spaces that can enter the performance. At ground level, the square seems to sink into the earth, creating a portal as grass grows through the wall.

THE RING: WEIGE

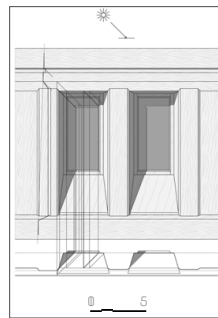

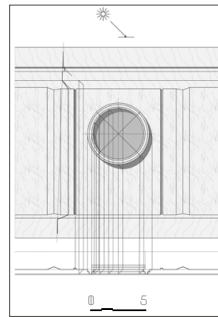

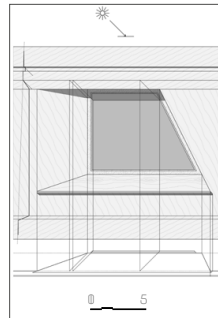

BRIEF: MIXED-USE RESIDENTIAL COMPLEX;
LOCATION: NOVOKURYANIVO, MOSCOW;
INDIVIDUAL PROJECT;
TIMEFRAME: JAN'25 - JUN'25.

The Weige explores dense volume and the private life held within it. Internal pedestrian streets and public spaces carve through a monolithic mass, creating a sculpted private core. Raised on supports, the building becomes one of

the main gateway to the Ring, linking the inner landscape with the city. It is organised into residential blocks, public levels, and a bank-depository, with the housing formed from modular room-cells that create varied living layouts.

NEW GROUNDS

BRIEF: MASTERPLAN;
 LOCATION: LANTAU, HONG-KONG;
 T: A. DROFA, M. BORISENKO, G. GAREEVA, U. GOTOVSKAYA, M. MILAEVA;
 TIMEFRAME: JAN'24 - APR'24.

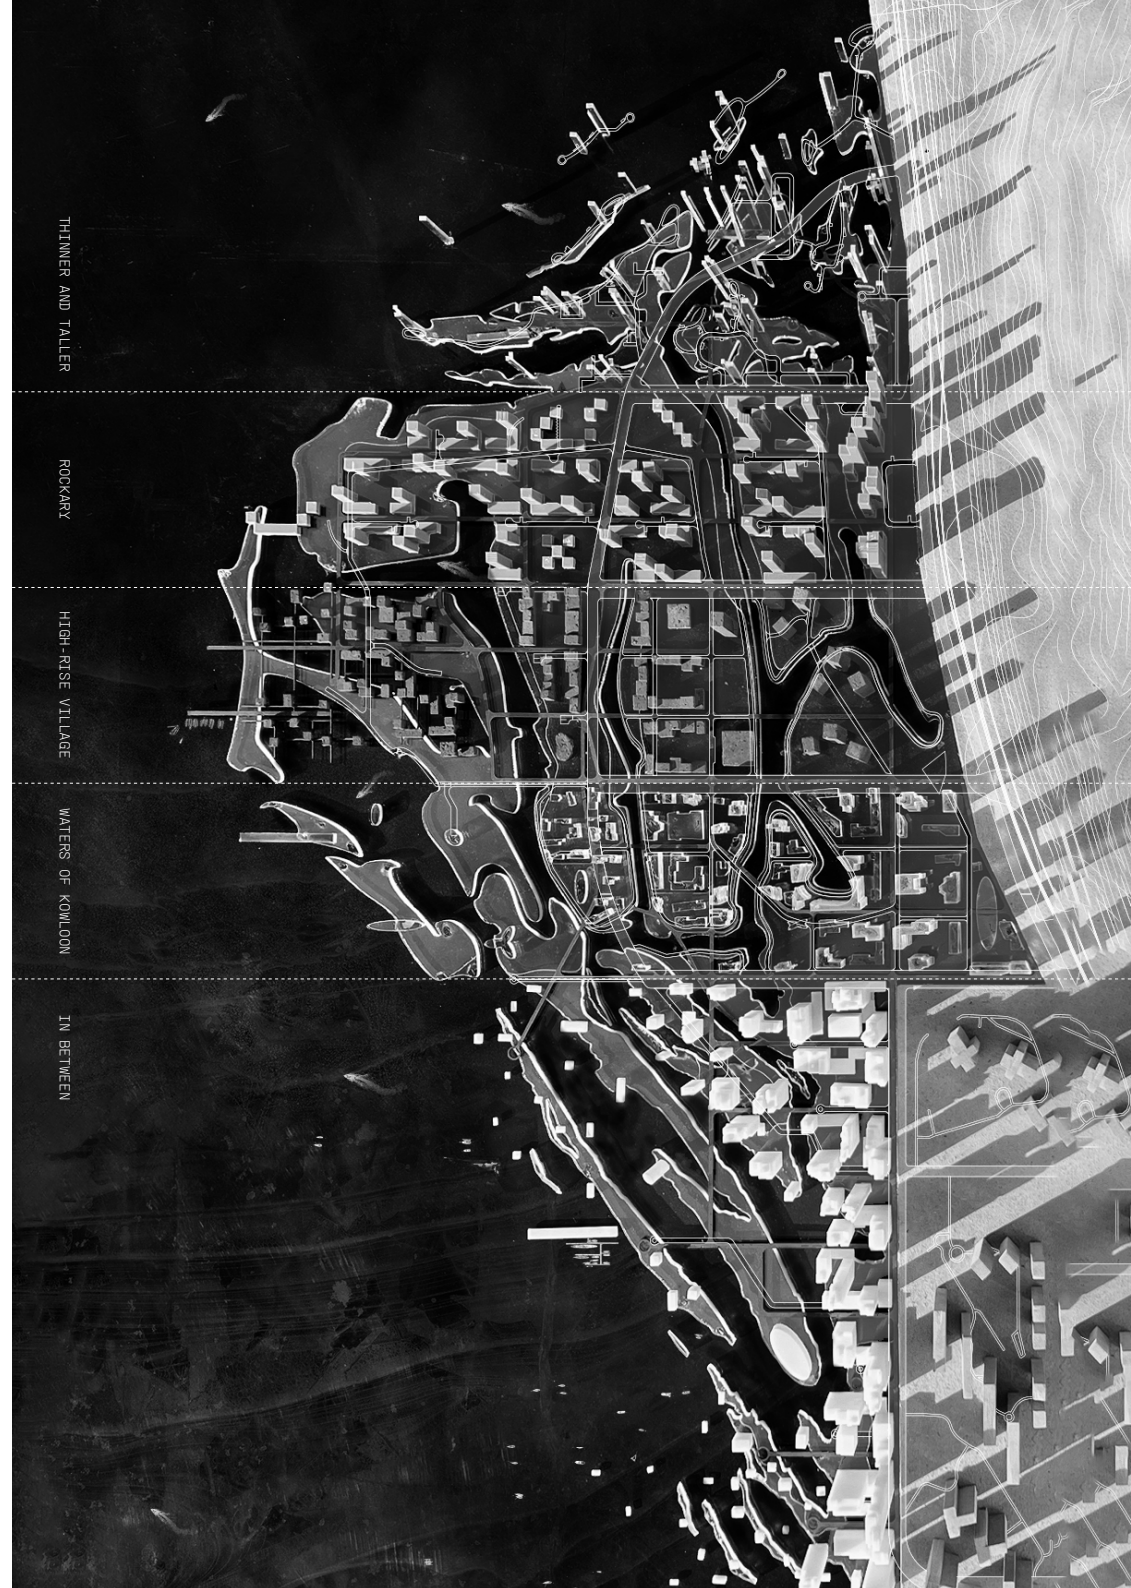

The team focuses on Hong Kong's expanding coastline. The proposal extends the Tung Chung reclamation, creating a longer, more varied waterfront – a flexible and vibrant landscape that supports daily life, and evolving community needs.

My part of New Grounds is a landscape of pencil towers. The land-water edge remains clear, yet the towers' slim, low-density form brings openness. They can cluster into denser formations, becoming blocks of flats or public centers.

BOUQUET

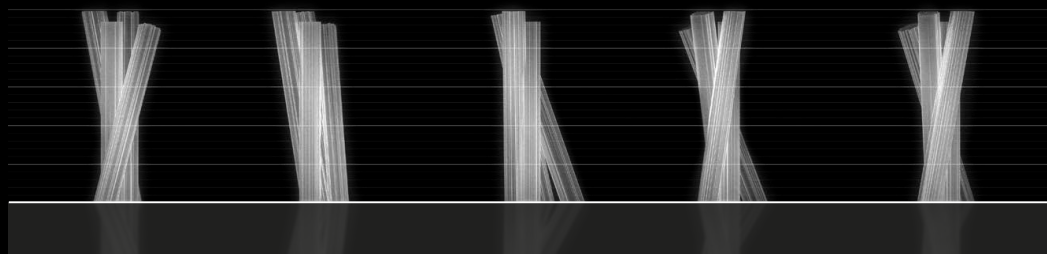

BRIEF: HIGH-RISE APARTMENT BUILDING;
LOCATION: LANTAU, HONG-KONG;
INDIVIDUAL PROJECT;
TIMEFRAME: APR'24 - MAY'24.

The Bouquet House is the second exploration of the “pencil-case tower” typology. It consists of four inclined pencil-case towers: three inhabited towers and a fourth containing the stair and elevator core. All four lean into and cut through

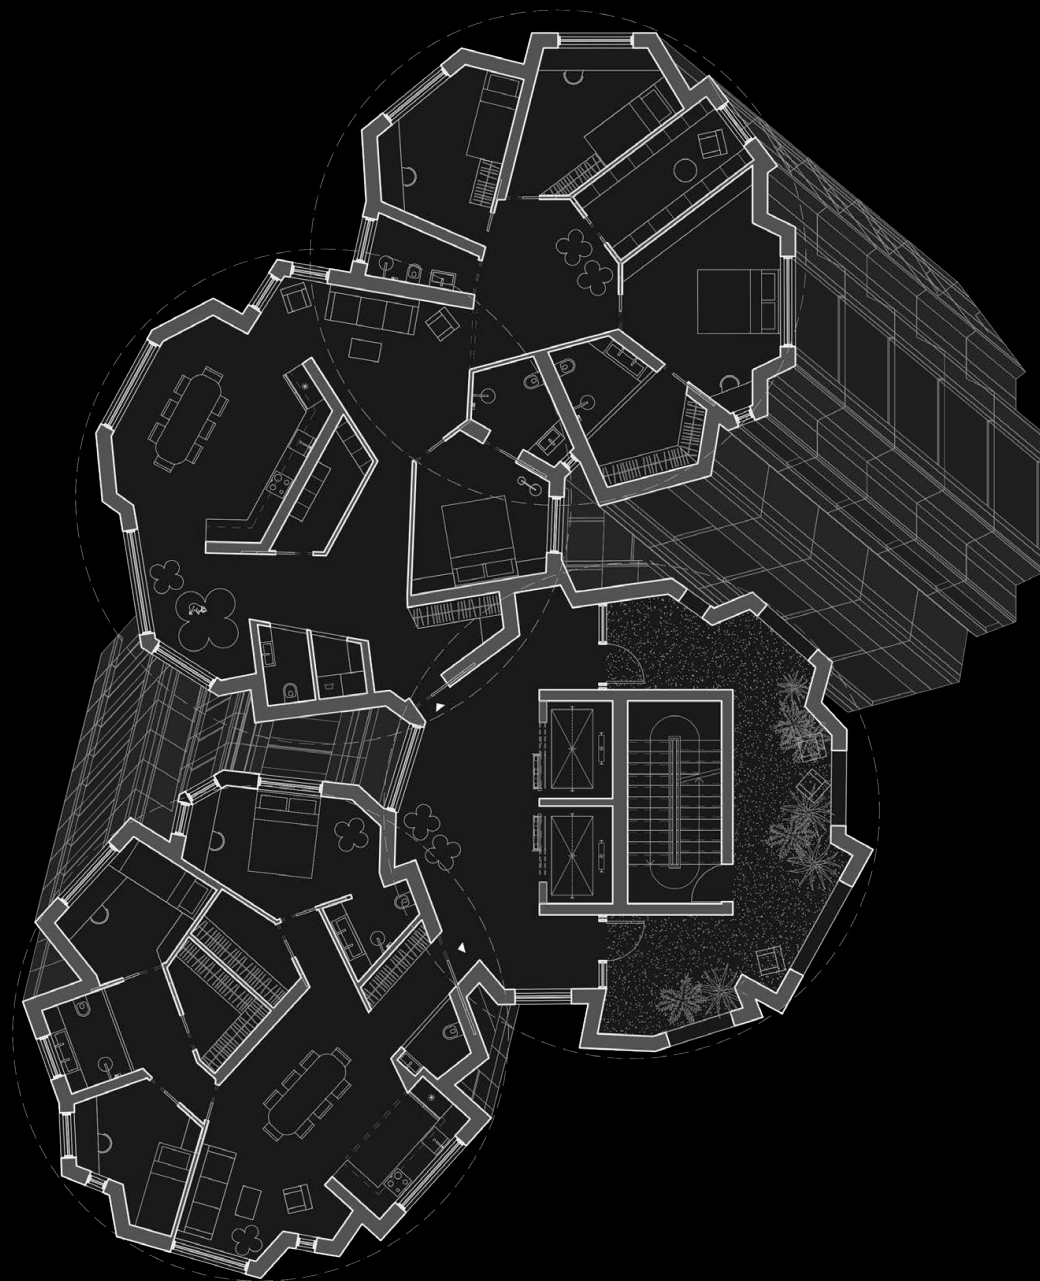

one another—unlike the typical Hong Kong tower—creating a unique apartment layout. The façade, fragmented by pipes and panels, still maintains its verticality. When it rains, each drop clearly resonates across the metal surfaces.

GORODKI

BRIEF: FUNCTIONAL OBJECT;

LOCATION: A BOOKSHELF;

T: M. ABRAMOVA, I. BEDNIK, M. BORISENKO, E. NESTEROVA, M. MILAEVA;

TIMEFRAME: JAN'24.

The brief called for a functional “beginning & skeleton” object, and this domesticated version of gorodki became the answer. The traditional outdoor game is scaled down into a wall panel whose pieces slide onto wooden pins, forming

a shifting composition between games. Freed from strict competition, it encourages new figures, playful and improvised throws, and simple enjoyment – even indoors, without a dedicated court, perfect for spontaneous play.

DOMIK

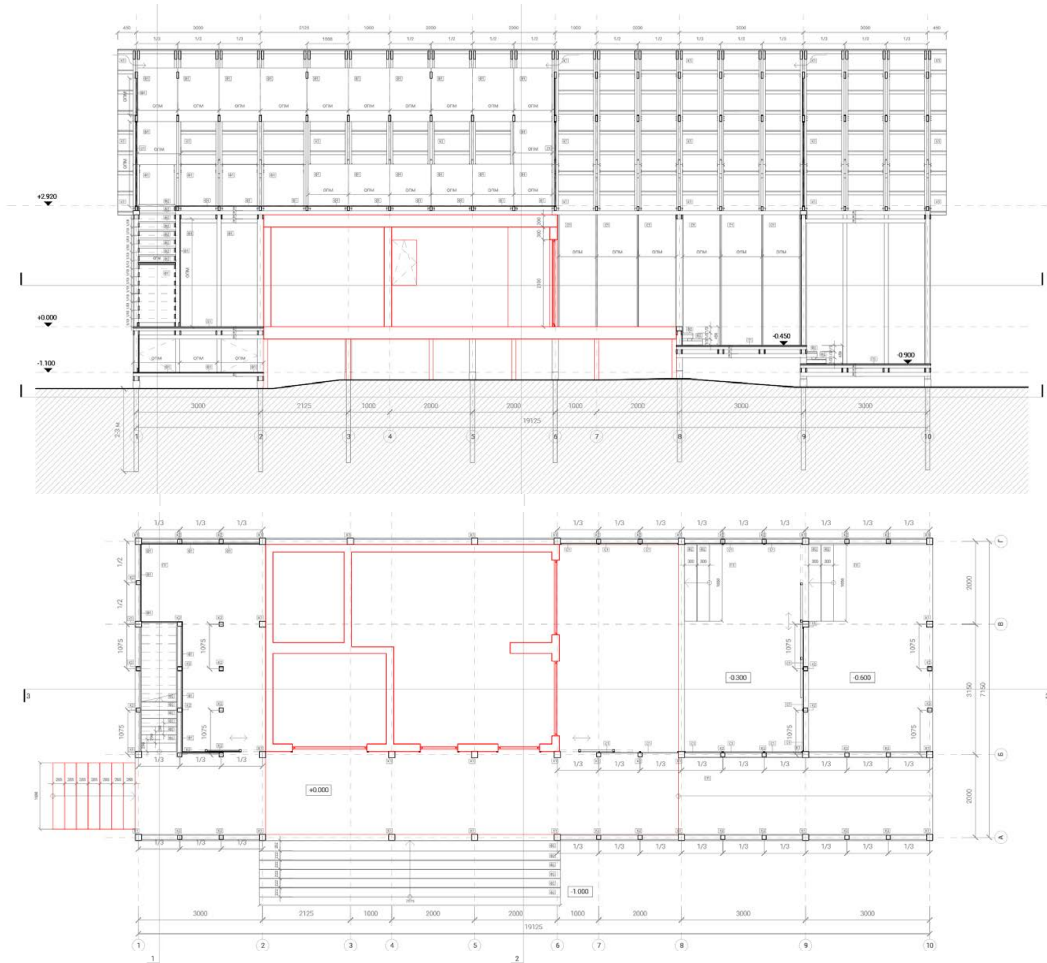

BRIEF: SINGLE-FAMILY HOUSE [CONSTRUCTION DRAWINGS];
LOCATION: NIKOLA-LENIVETS;
TEAM: I. BEDNIK, A. PARSHIKOVA, M. MILAEVA;
TIMEFRAME: AVG'25.

In the landscape of Nikola-Lenivets, the house stands alone in an open field. It began as a simple frame house [red], and the task was to transform this bare structure into something warm and pleasant – adding a wooden veranda and attic.

Beyond the overall form, many elements were designed from scratch – unique wooden trusses and custom details developed together with the engineer. I was invited to draw the full set of plans and refine these construction solutions.

PL.3\ JOINTS [BY I.BEDNIK]

SINAGOGA SKOLKOVO

BRIEF: JEWISH COMMUNITY CENTER [ARCH.CONCEPT];

LOCATION: SKOLKOVO, MOSCOW;

TEAM: Y. GRIGORYAN, R. NASRIDINOV-BITSON, Y.KUZNETSOV, M. MILAEVA;

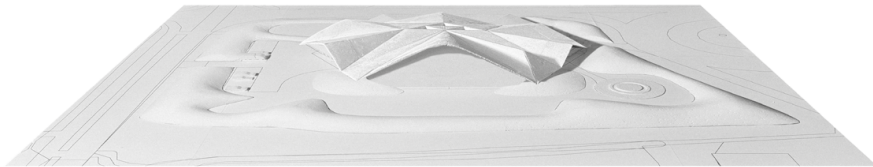

TIMEFRAME: JAN'25 - SEP'25.

This project grew out of strict real-world constraints: underground utilities left only a small buildable area, yet it had to house a hotel, synagogue, banquet hall, and kosher café within one structure. The compact hexagonal form

is topped by a sculptural roof, developed through physical models, with three triangular skylights above the stair. A deep wooden overhang rests on a forest of poles. Inside, a double-height hall opens visually onto a green courtyard.

BY HANDS

BRIEF: PROCESS AND PRESENTATION WORKS;
SELECTED MODELS & DRAWINGS;
INDIVIDUAL & TEAM PROJECTS;
TIMEFRAME: '24 - '25.

My projects are powered by hands. This section gathers drawings and physical models that support the design process and act as a medium for exploration. I mainly work with fine pencil drawings, while also experimenting with other

techniques, including digital ones. Models range from quick studies to detailed pieces with interiors, made from metal, paper, cardboard, wood, and foam. Together, these hands-on methods test ideas beyond the screen.
